1989, Gene Annal Techn 6:131

Author Index Volume 6

Ahn, Y. H., 1
Akusjärvi, G., 101

Barry, T., 21
Beer, M., 75
Bhat, N. K., 44
Brantley, J. D., 75

Capone, J., 62
Chen, S.-M., 97
Chen, Z.-Q., 44
Cummings, B., 89

Daugherty, B. L., 1
Delidow, B. C., 120
Dubois, G. C., 47

Fisher, R. J., 47
Frech, G. C., 33
Fujiwara, S., 44

Gannon, F., 21

Hartas, J., 29
Hirota, Y., 57
Horikoshi, K., 57
Hotta, K., 1

Jansen, R., 79
Joho, R. H., 33

Kreitman, M., 84
Kumar, C., 1

Lambert, M. W., 39
Lambert, W. C., 39
Landweber, L. F., 84
Lautenberger, J. A., 44
Ledley, F. D., 79
Lee, M.-L., 71

Maizel, J. V. Jr., 111
Marotti, K. R., 67
Maruyama, I. N., 57
Morgan, A., 21

Nagase, Y., 57
Nakata, K., 111
Nobuhara, M., 57

Ortlepp, S. A., 93

Papas, T. S., 47, 97
Peluso, J. J., 120
Pestka, S., 1
Pintzas, A., 125
Potts, M., 17
Psallidopoulos, M. C., 47

Salvato, M., 25
Seth, A., 47, 97
Shimomaye, E., 25
Soma, M., 57
Spandidos, D. A., 125
Sriprakash, K. S., 29
Stack, M., 21

Thompson, D., 97
Tomich, C.-S. C., 67

White, B. A., 120
Wood, T., 89

Yanamandra, G., 71
Yasuda, S., 57

1989, Gene Anal Techn 6:132–133

Subject Index Volume 6

β-Actin, 120
Agarose block, 71
Agarose gel electrophoresis, 17
Alkaline phosphatase conjugated secondary antibody, 62
Aminoglycoside phosphotransferase gene, 125
Amniocytes, 71
Antibody probes, 62
Antisense RNA
  cDNA libraries used for in vitro synthesis of, 33
  mRNA molecule translation and, 1
ATG initiation codon, 97
Avian myeloblastosis virus reverse transcriptase, 25

Baculovirus plaques, 62

cI bacteriophage repressor, 111
cII-mos-myc protein, 47
Ca^{2+}, 120
cDNA
  directional libraries of, 33
  identification of clones of, 21
  ovarian, 120
Chloramphenicol acetyltransferase gene, 125
Chromatin, 75
Circular plasmid DNA template, 67
Cloning, 89
c-*myc* exon 1, 47
Colloidal gold, 75
Cro bacteriophage repressor, 111

Detergents, 101
Dideoxy sequencing protocols, 84
Discriminant analysis, 111
DNA
  boiling method for preparation of, 93
  detection of target, 29
  discrete high specific activity probes, 79
  double-stranded, 67
  duplex, 57
  genomic, 89
  hybridization of, 89
  isolation and characterization of human, 71
  regulatory protein binding regions for, 111
  replication of, 101
  single-stranded, 84
  template, 67
Douncing, 101

EcoRI, 33
EcoRV, 97
Electron microscopy, 75
Electrostatic free energy, 111
Endomycorrhizal spores, 89
Endonucleases, 39
Escherichia coli
  294, 1
  CAP protein of, 111
  c-*myc* exon 1 in, 47
  DH5-alpha, 17
  lactose operator sequence of, 57
  recombinant protein production in, 97
Exonucleases, 17

Fibroblasts
  human DNA isolated from, 71
  rat, 125
Formamide gels, 25
Full-length inserts, 33

β-Galactosidase
  host bacterium rendered constitutive for, 57
  inhibition of synthesis of, 1
GH_3 pituitary cells, 120
Glomus spp., 89

Hairpin extension, 29
HeLa cells, 71
HindIII restriction endonuclease, 75
HpaI, 97

Immunoscreening, 62
Insulin, 125

β-Lactamase structural gene, 57
Leukocytes, 71
Lymphocytic choriomeningitis virus, 25
Lysolecithin, 101

Mixed alkyl trimethyl ammonium bromide, 89
mRNA
  anti-*lacZ,* 1
  first-strand DNA synthesis on size-selected, 33
  isolation of, 44
  polyadenylated 3′ end of, 21
  quantitative measurement of, 120

Northern blot analysis, 120
NotI, 33
Nuclear extract preparation method, 101

Oligo dT, 21
Oligonucleotide primer, 67
Oligonucleotide probes, 29
Oligonucleotides
  annealing of to chromatin, 75
  DNA probes produced between any two sequences of from templates, 79
Open reading frames
  c-*myc* exon 1, 47
  vector for protein expression in, 97
Operator-binding protein, 111

pBR322, 57
pGEM-4, 17
Phage lambda P_L promoter
β-galactosidase mRNA under control of, 1
in pN-7, 97

© 1989 Elsevier Science Publishing Co., Inc., 655 Avenue of the Americas, New York, NY 10010

0735-0651/89/$03.50

1989, Gene Anal Techn 6:132–133

Phage lambda vector, 33
Phage T4 gene 32 product, 67
Phenol-chloroform denaturation
  of human DNA, 71
  immunologic detection of protein antigens after, 44
Plasmid deletion clones, 17
pMCP60, 47
pN-7 expression vector, 97
Poisson and non-Poisson combinatoric analysis, 39
Poly dT probe, 21
Polymerase chain reaction
  discrete DNA probe synthesis via, 79
  extension by, 29
  mRNA measurement via, 120
  single-stranded DNA produced via, 84
Premature termination, 25
Pre-mRNA splicing, 101
Prolactin, 120
Proteinase, 89
pWQX001, 17
pWQX005, 17

Quick screening, 17

ras p21 oncoprotein, 125
Restriction fragment polymorphism analysis, 71
Reverse transcription, 120
Ribosome binding sites
  cII, 97
  lacZ, 1
RNA polymerases, 101
RNA sequence analysis, 25

Sanger's dideoxynucleotide chain termination method, 17
Sea urchin *ets*-related antigen and mRNA, 44
Sense RNA, 33
Sequence compression, 25
Sequence variation, 84
SfiI, 33
Site-directed mutagenesis, 67
SmaI, 97
Southern blot analysis, 21
Streptavidin, 75
Synthetic tranlation terminator gene, 57

T3 RNA polymerase promoter, 33
T7 exonuclease, 75
T7 RNA polymerase promoter, 33
T24 human H-*ras1* gene, 125
Template secondary structure, 25
Transcription-competent cloning vectors, 33
Translation direction, 57

Vesicular-arbuscular mycorrhizal fungi, 89
v-*mos* gene, 47
Vmw65 Herpes simplex virus transacting factor, 62

Xenopus laevis erythrocyte chromatin, 75
